

You are invited to attend:

SUSTAINABLE FORESTRY ON ORCAS ISLAND

June 24th, 12:30—5:00 pm
Orcas Island Grange

Forest owners on Orcas Island have a wide range of management options for their forests, including producing periodic income, enhancing wildlife habitat or improving the health, vigor and aesthetics of their forests (or a combination of all!). However, many forest owners don't know how to manage their forests to meet their objectives or what resources and assistance are available to help them.

This afternoon seminar will explore management options for improving the health and productivity of island forests as well as opportunities for local milling, manufacturing and sales of sustainably produced wood products.

Topics will include:

- Milling, manufacturing and marketing local lumber
- Common forest health issues on Orcas Island
- Sustainable timber management
- Using ecological principals to restore forest health and productivity
- Current use taxation issues
- Long-term conservation resources
- Financial assistance programs

This seminar is for anyone interested in supporting a sustainable forest economy on Orcas Island. Come meet your neighbors and join the discussion on how forest owners on Orcas Island can improve the health and productivity of your forests!

DATE: Friday, June 24th, 2011

LOCATION: Orcas Island Grange, 3252 Orcas Road.

COST: Free

REGISTRATION: Pre-registration is required as space is limited. Please register by either completing an [on-line registration form](#), mailing in the form on backside of this flier, or contacting Kirk Hanson.

MORE INFO: Kirk Hanson: 360-316-9317, kirk@nnrg.org

Northwest Certified Forestry is a non-profit membership and services program developed by the Northwest Natural Resource Group to assist small forest landowners with optimizing the economic and ecological potential of their forestlands. Visit www.nnrg.org for more information.
